

CITIZEN NOTICE OF ICDBG-CARES PLANS

The Bad River Tribe intends to apply for the HUD ICDBG-CARES Grant to further prepare, prevent for, and respond to COVID-19 in our community. The purpose of this notice is to seek and consider feedback/comments from the community prior to finalizing the project proposal which is due June 1, 2020.

The proposed project will include purchasing tiny homes to serve as isolation locations since the Tribe has high rates of overcrowding in homes. By creating spaces for COVID-19 positive community members to stay, the risk of spreading to family members and the community will be lowered.

Additionally, the condemned old fire hall will be demolished since it is a safety hazard and a facility for public safety will be built. The new public safety facility will then serve as central training for emergency services as well as the command center for COVID-19 and future emergency events.
